Thanks Lynn

I will plug that workstation into the documents as soon as you have it, then insert it into the SOW and forward it Acquisition Services Division.

Do you have a furniture program for the model office with bid sheet etc? That will have to be fast-tracked even quicker than the 999 furniture

Josh will present the mail sorter to the Project 888 team and get back to you, I can't tell by the calendar if there is a meeting August 4th or not

Phil

Phil,
I'm sorry, I wasn't aware of the current strategy. Our understanding is that nothing was required until September. We will get the workstation drawing into the pipeline. We should have it by early next week.

We don't really have time to wait, we are putting together the first task order & solicitation now,

which includes the model show room, swing space and phase one. While our contract gets vetted by General Law, we are pushing to have everything **Acquisitions Services Division (ASD)** requires in order to release the first tasks & solicitation right after the documents is signed.
This WK.02-2 **(with a separating partition)** needs nomenclature and specifications so that we can satisfy our **ASD** with exact details

We planned to deal with that once the procurement agents were on board and we further discussed

procurement strategy with them. It is not really a spec, but a variation to be tested just at the mock up.

When do you expect it will be available?

Phil,
We have not prepared that drawing yet.

Lynn

I have been looking through the Furniture Specifications and I cannot find a workstation with a partition in the middle, this is the configuration we are using

in the model offices we are constructing on the 4th floor.

Would you forward me a specification sheet with this configuration?

Thanks

Phil
